PROFESSIONAL SUMMARY

Results-driven Senior Unity3D Game Developer with 7+ years of experience designing, building, and shipping 2D & 3D mobile games using Unity (C#). Specialist in real-time multiplayer systems, casino game mechanics, performance optimization, and monetization (IAP & AdMob). Proven track record delivering commercial Android titles from prototype to Play Store — including live casino platforms, arcade games, and quiz titles. Experienced working in agile teams across India and the UAE with strong cross-functional collaboration skills.

TECHNICAL SKILLS

Game Engine	Unity3D (C#) • 2D & 3D Mobile Games • Physics & Animation • Shader/VFX
Multiplayer	Real-time Multiplayer • Photon PUN • WebSocket / TCP • Client-Server Sync
Android / Build	Android SDK • Play Store Deployment • CI/CD Pipelines • Asset Bundles • Addressables
Monetization	In-App Purchases (IAP) • Google AdMob • SDK Integration • Analytics / KPIs
Architecture	Performance Optimization • Memory Management • Level Design • Game Systems Design
Frontend / Tools	React • JavaScript • HTML/CSS • REST APIs • Git • JIRA • Firebase

PROFESSIONAL EXPERIENCE

Senior Unity3D Game Developer

Feb 2024 – Present

Valsense LLC

Dubai, UAE

- Lead engineer on a Live Stream Casino platform (Teen Patti, Poker) supporting thousands of concurrent real-time players on Android.
- Architected real-time gameplay systems including server-synced game state, custom animation controllers, and responsive UI flows.
- Integrated third-party SDKs (AdMob, analytics, payment gateways) and established KPI dashboards for monetization tracking.
- Drove sprint planning and task management via JIRA in an agile team, ensuring consistent on-time delivery.

Unity3D Game Developer

Sep 2022 – Jun 2023

Lazulite Technology Services

Dubai (Remote)

- Developed and shipped performance-intensive mobile games in Unity (C#) targeting a wide range of Android hardware tiers.
- Built game UI systems, gameplay mechanics, and asset optimization pipelines (Addressables, Asset Bundles) to minimize APK size.
- Profiled and resolved CPU/GPU bottlenecks achieving a stable 60 FPS on mid-range devices through draw call reduction and LOD tuning.

Unity3D Game Developer (3D)

Aug 2021 – Aug 2022

Live Nation Entertainment

Gurugram, India

- Shipped two commercial titles: Unicorn Run (Candy Land) — a 3D endless runner — and Tripzy, a real-time multiplayer quiz game.

- Implemented physics-based player controllers, rigidbody interactions, animation state machines, and complete UI systems.
- Managed Android build pipelines and provided live deployment support including hotfix releases post-launch.

Unity3D Game Developer

Jan 2020 – Jan 2021

Quy Technology Pvt. Ltd.

Gurugram, India

- Built a feature-rich Slot machine game and a real-time Ludo multiplayer game with server-synced room-based matchmaking.
- Integrated Google AdMob and Unity IAP systems, establishing core monetization revenue streams for both titles.
- Reduced RAM usage by ~25% and improved frame pacing through memory profiling, texture atlasing, and object pooling.

Unity3D Game Developer

Oct 2018 – Nov 2019

BR Softech Pvt. Ltd.

Jaipur, India

- Delivered multiple casino and board game titles (Teen Patti, Ludo, Slots) end-to-end from design to Play Store publishing.
- Designed core gameplay logic, dynamic UI layouts, animation controllers, and win/loss condition systems.
- Gained full-lifecycle production experience: monetization strategy, Play Store listing management, and post-launch patching.

FEATURED PROJECTS

Teen Patti Live Casino <i>Live Stream Casino · Valsense LLC</i>	Real-time multiplayer card game with live dealer streaming, custom animation system, and third-party ad/analytics SDK integration. Served thousands of concurrent players.
Poker Multiplayer <i>Live Casino · Valsense LLC</i>	Full-featured Poker with real-time hand evaluation, server-synced betting rounds, and responsive UI built for Android.
Unicorn Run (Candy Land) <i>3D Endless Runner · Live Nation Entertainment</i>	Commercial endless runner with procedural level generation, physics-based character controller, and Play Store launch support.
Tripzy – Quiz Game <i>Real-time Quiz · Live Nation Entertainment</i>	Live multiplayer quiz game with real-time leaderboard, timer mechanics, and smooth UI animations shipped to production.
Ludo Multiplayer <i>Board Game · Quy Technology</i>	Online Ludo with server-synced gameplay, room matchmaking, IAP integration, and AdMob monetization yielding measurable revenue growth.
Slot Machine Game <i>Casino · BR Softech & Quy Technology</i>	Built multiple slot titles with reel physics, win animations, and bonus mechanics. Reduced memory usage by ~25% through asset optimization.

EDUCATION

Bachelor of Technology – Computer Science

Jul 2014 – Jul 2018

A.P.J. Abdul Kalam Technical University

Kanpur, India

Relevant coursework: Data Structures, Algorithms, OOP, Software Engineering, Computer Graphics

CERTIFICATIONS & TOOLS

- Google Play Console – Published & managed multiple live Android game titles
- Unity Analytics & Firebase – Event tracking, crash reporting, and user retention analysis

- Agile / Scrum – Sprint planning and delivery via JIRA across distributed teams
- Version Control – Git (GitHub / GitLab) with branching strategies for game projects

KEY ACHIEVEMENTS

- Delivered 10+ shipping Unity3D titles across casino, arcade, and casual genres over 7+ years of uninterrupted production.
- Reduced game RAM usage by ~25% through object pooling, texture atlasing, and Addressable asset management.
- Achieved stable 60 FPS on mid-range Android devices through systematic GPU/CPU profiling and draw call optimization.
- Worked internationally across India (Jaipur, Gurugram) and UAE (Dubai), adapting to remote and on-site agile environments.
- English – Full Professional Proficiency; passionate competitive gamer with deep product empathy for end-user experience.
